

360 vs 365.2422.... Day Year Issue

Shalom Friends

This is one of the most interesting articles I have read yet on the 360 day year topic. I highly recommend that you read this carefully.

<http://www.watchmanbiblestudy.com/Articles/GuyCramer/360vs365.htm>

"....Surely our fathers have inherited lies, vanity, and things wherein there is no profit". - Jer 16:19

"...many prophets and righteous men have desired to see those things which ye see, and have not seen them; and to hear those things which ye hear, and have not heard them. Mat 13:17

Creation Calendar

By Troy Miller

**Ezekiel saw more than just a wheel in the sky.
He also saw and understood the Creator's Calendar.**

**A "thirteenth month" is located in Scripture.
Naturally.**

Today, a calendar based on the moon and the sun requires a 13th month approximately every 3 years. Originally it was not so, the lunar and solar cycles were both 360 days. Presently, the lunar year is 11 days shorter than the solar year meaning that after three years, the lunar cycle would be 33 days off, necessitating an additional month. This month was called Veadar (meaning "second Adar").

A 13th month is proven from scripture in the inspired book of the prophet Ezekiel. In **Ezekiel 1:1-2** we are told that Ezekiel received a vision from YHVH on the 5th day of the fourth month, in the fifth year of king Jehoiachin's captivity. In **Ezekiel 2:7** YHVH again speaks unto Ezekiel telling him to warn Israel concerning their treachery against YHVH. Then in **Ezekiel 3:15** we find that Ezekiel dwelt by the river Chebar for seven days bringing us to the 11th day of the fourth month, in the fifth year of king Jehoiachin's captivity.

Do you see the problem? Ezekiel has to be lying on his side for 430 days total, yet UNLESS you factor in a 29 day 13th month, you come up short regardless of which calendar you use.

If you insist that this count begins on the 12th day of the 4th month or that these visions took place over weeks or months rather than the 7 days, all this does is paint yourself into an even deeper corner adding days that Ezekiel had to be on his side WELL beyond the 5th day of the 6th month of the 6th year of king Jehoiachin, a date by which Ezekiel is up and about (off his right side). The only way for him to be up at this date is if the 390 + 40 days are over. Starting the count on the 12th, delaying the beginning of his assignment, as well as not including a 13th month forces Ezekiel to disobey Yah.

Perhaps a 13th month is not named or spelled out, but there nonetheless. Looks like this...

$$18 + 30 + 29 + 30 + 29 + 30 + 29 + 30 + 29 + 30 + 29 + 30 + 29 + 30 + 29 + 30 + 29 + 30 + 5 = 436 \text{ days}$$

Meaning Ezekiel was sitting in his gate nearly a week after he got up off his right side.

Respectfully submitted,

Troy Miller
